

Guy Stephane Waffo Dzuyo

Machine Learning Researcher · Financial Fraud Detection · Large Language Models

+33 (0)7 58 87 58 00 guywaffo@gmail.com [Paris, France](#)

[My Website](#) [Waguy02](#) [waguy02](#) [GDzuyo](#)

Education

MSc in AI & Data Science (MOSIG) · Double degree

2021 – 2022

Grenoble INP-ENSIMAG – MSc + 3rd-year Engineering

Engineering Degree in Computer Science

2020 – 2021

Grenoble INP-ENSIMAG – Grenoble, France

Computer Science, Mathematics & Physics

2016 – 2020

National Advanced School of Engineering – Yaoundé, Cameroon

Work Experience

Cifre PhD Student – LORIA / Forvis-Mazars

Apr 2024 – present

Nancy / Paris, France

- Pattern recognition – sector-specific patterns in balance sheets & income statements
- Causal modeling & anomaly detection – temporal dependencies of journal entries
- Risk assessment – risk scoring of financial-statement sections

Machine Learning Engineer – Forvis-Mazars

Jun 2023 – present

Paris, France

- Generative AI applications for audit workflow enhancement
- LLM deployment & optimisation with vLLM

R&D Engineer – OWI

Oct 2022 – Jun 2023

Antony, France

- ML-based chatbot engine powered by a business knowledge base

Data Science Research Intern (PFE) – Dassault Systems

Feb 2022 – Aug 2022

Velizy-Villacoublay, France

- Style-based 3D indoor-scene recommendation (metric learning & transformer decoders)

Publications

Benchmarking Generalization in Financial Statement Fraud Detection: Robust Evaluation and Novel Tasks

IJCAI-ECAI 2026 (FINLLM), Bremen – Published 2026

[arXiv](#)

Company-isolated financial-statement fraud-detection benchmark showing random splits inflate AUC; per-company evaluation is essential for honest generalization.

ForensicBench: Evaluating Agentic LLMs on Journal-Entry Fraud Detection

EMNLP 2026 (Industry Track), Budapest – Accepted 2026

[OpenReview](#)

First benchmark for agentic LLMs on scheme-level journal-entry fraud detection; 12 open-weight models, best reaches 34.7% Entry-F1.

Linking Industry Sectors and Financial Statements: A Hybrid Approach

AAAI 2025, Philadelphia – Published

[AAAI](#)

Hybrid text-numeric model classifying industry sectors from financial statements (best MCC 0.71).

SISDH: Simulating the Evolution of COVID-19 in Cameroon

WJET 2021 – Published

SMA-s-and-SIRs model simulating the evolution of COVID-19 in Cameroon.

Skills & Languages

AI / ML

PyTorch, TensorFlow, Scikit-learn, LLMs, NLP, vLLM

Cloud / DevOps

GCP, AWS, Docker, Kubernetes

Spoken French (native) · English (B2 – TOEIC 815/990)

Certifications

Machine Learning Fundamentals – Stanford, Coursera

Fundamentals of Building AI Agents – IBM, May 2026

Python Programming – Wesleyan University, Coursera

Programming

Python, Java, C, C++, Rust, SQL, TypeScript

Data / Analytics

Excel, Tableau, Power BI, R, MATLAB

Deep Learning – deeplearning.ai, Coursera

Introduction to Financial Accounting – U. Pennsylvania, Jan 2025
